Manj Singh

Backend Developer
Toronto, ON

GitHub LinkedIn Contact

Summary

Backend developer with an IT degree and 5 years in debt collections operations, including leading a team of 10-12 collectors. Building Python and FastAPI APIs informed by hands-on skip-tracing and recovery work. Seeking a backend developer role in Toronto; open to relocation and US remote.

Projects

Skip-Trace Analysis Tool

Skip-tracing API for debt collection
In progress
Project Code
Python, FastAPI, PostgreSQL, SQLAlchemy, Pydantic, JWT

- Building a FastAPI backend that lets collectors search for debtors across Canadian public platforms, based on my skip-tracing work in collections
- Implemented JWT authentication (register and login) and protected routes using FastAPI dependency injection
- Built search endpoints with Pydantic validation and PostgreSQL persistence through SQLAlchemy; search history and lookups are scoped to the authenticated user
- In progress: Google Custom Search integration, email pattern inference with MX verification, and confidence scoring

Skills

Languages

Python, SQL, JavaScript

Backend

FastAPI, REST APIs, JWT Authentication, PostgreSQL, SQLAlchemy

Frontend

HTML, CSS, React

Tools

Git, GitHub, Postman, VS Code

Experience

FDR Ltd.

Team Lead, Collections

Richmond Hill, ON

September 2021 - Present

- Collect $100K+ CAD per month in outstanding debt through outbound calls to debtors
- Lead a team of 10-12 collectors: manage performance, train and onboard new hires
- Design collection strategies based on market conditions to meet collection goals
- Conduct skip tracing from publicly available data, storing results in a reusable format and analyzing the data
- Coordinate with law firms, litigators, and lenders on account recovery
- Prepare and maintain collections reports

Education

I.K. Gujral Punjab Technical University (formerly Punjab Technical University)

Bachelor's Degree

Information Technology

2016
